MAIN FEATURE

WHITNEY

LEXDOX

Whitney Houston – big hair, even bigger voice, and with a place in our hearts due to our understanding of the weakness and exploitation in her life. But just when you think you have it all figured out - the drugs, betrayal by her father, marriage to abusive Bobby Brown and all – director Kevin Macdonald unearths an allegation that causes you to think again. "The film captures the quality that made Whitney Houston magical, but more than that it puts together the warring sides of her soul." Variety

LEAVE NO TRACE

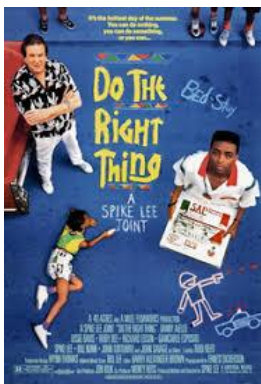

A man and his teenage daughter live off the grid in the Oregon forest until one mistake brings them to the attention of the System. They embark on a hazardous journey back to the woods, but sometimes you can't go back... "Director Granik (Winter's Bone) lets glimmers of hope fight their way into her unflinching view of a broken America. That's what gives her hypnotic and haunting tale...its quiet power and amazing grace." ★★★★★

TIME TRIAL + recorded Q&A

LEXDOX

The intended valedictory story of top road cyclist David Millar's success becomes a fascinating, engaging look at ageing in sport when he is dropped from his Tour de France team mid-doc. "Immersive and surprisingly intimate." Variety

LFS: DO THE RIGHT THING + intro

Spike Lee's scorching 1989 satire on race in America is "radical filmmaking at its best; it'll have you arguing -- and laughing -- all the way home." (Wash Post) Film + live intro by Anthony Andrews + screening notes and recommends, only £8/6.
